

Encik Adnan Bin Abd Wahab

Profession : **General Worker**

Blood Sugar Level Before and After Drinking

a) **Before** : **28 mmol/L**
b) **After** : **6 mmol/L**

Saving the Limbs from Amputation

Most diabetic patients suffer from wounds on their limbs and when they turn gangrenous, they have to be amputated. This was the situation that Mr. Adnan, 61 year old, who lives in a village in Kuala Kangsar was in. The prognosis of the doctors was bad and they advised him to have his right leg amputated due to the gangrenous wounds on it. However Adnan's leg was saved when he discovered the miracle product by drinking GlucosCare Herbal Tea. Soon after learning that his right leg has to be amputated, he was in tears as he was reluctant to lose his leg. He decided to go to a Chinese Medical shop to get some advice. While he was there he met Mr. Lau who introduced GlucosCare Herbal Tea to him.

According to Mr. Adnan, "After taking Glucoscare Herbal Tea for 2 weeks, the wounds on my legs started to heal. In the past, I had to wear a bigger size shoe for my foot on my badly infected, smelly and swollen right leg but now this foot has returned to normal size." He further vouched for the effectiveness of GlucosCare Herbal Tea in alleviating his diabetic condition. According to him, "I am using 6 sachets of Glucoscare Herbal Tea every day and now my blood sugar level has dropped from 28.3 mmol/l to 5.7 mmol/L. Nowadays, I do not need medication for my diabetes but instead I take GlucosCare Herbal Tea.
