### **Blood Sugar Level Before and After Drinking**

RBS Before: 180

RBS After: 100

I was diagnosed with diabetes and diabetic dermopathy (type of skin lesion). I have been drinking numerous medications but have not been that effective. After continuously drinking the tea, I find that my diabetic symptoms have improved and the patches in my face have lightened. I now am able to maintain normal sugar levels. I highly recommend this product as it had improved my health greatly.
